# About Hai Moldova campaign

This year, Hai Moldova launched a general mobilization for the collection and recycling of medium-sized electronic waste through a national campaign of electronic waste collection. Following this purpose, from 15th of September until 15th of October, a contest has been organized for all schools across the country, in which they were invited to apply and become national collection centers. Their goal within the competition was to gather the biggest quantity of electronic waste.

The launch of Hai Moldova campaign - Hai Moldova team next to prime-minister Maia Sandu

# The main stages of the competition:

- 1** Starting with the 20th of August until the 10th of September, the schools that wanted to participate had the chance to apply through filling a form. There were 76 schools that participated from different regions of Moldova. Each school designated two coordinators, one of them a teacher, and the other - a pupil, for facilitating the processes of collection and also of communication with Hai Moldova team.
- 2** The period of 10-20 of September was dedicated to the instalment of special collection containers in 40 of the whole 76 enrolled schools and signing collaboration agreements with all the participants.
- 3** The project was implemented between 15th of September and 15th of October. Among the electronic waste collected, there were batteries, mobile phones, cables, TV stations, computers, printers, fax machines, photo and video cameras, and other medium-sized electronic waste. The launch of the campaign was organized within IarmarEco 2019 - the fair for eco opportunities and social entrepreneurship.
- 4** In the following period of time, Hai Moldova collected the waste from all the centers, weighed it, and transported it to Moldrec platform in the capital city of Chisinau. Further on, after all the counting was done, the winners were awarded at the closing ceremony of the campaign which took place on the 14th of December.

*Special containers for electronic waste collection were installed at the event*

# The motivation of the campaign.

People tend to store at home batteries, used phones, and other electronic devices that once broken, they don't know what to do with them. One small battery only, which has been thrown away randomly, can damage 500 l of water or 1 square meter of soil for a period of 50 years.

Moreover, most of the electronic waste contains toxic elements such as lead, zinc, nickel, barium, chromium, flame retardant substances, etc. Once thrown into the nature, they can lead on a long term to cancer, dysfunctions of the central nervous system and the respiratory system, they can attack our immune system, endocrine system, and reproductive system.

The purpose of Hai Moldova team was to organize one month of national cleanup for collecting and recycling electronic waste stored by people at home.

# The campaign.

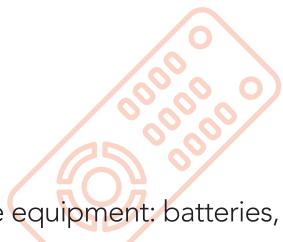

As a result of the call for applications, in the competitions registered 76 schools. The following items were collected:

household electronics: irons, kitchen tools, vacuum cleaners etc

IT equipment: laptops, tablets, computers, monitors, mobile phones, batteries, printers, xerox machines etc

general use equipment: batteries, photo and video cameras, radio stations, DVD players, remotes, video players etc

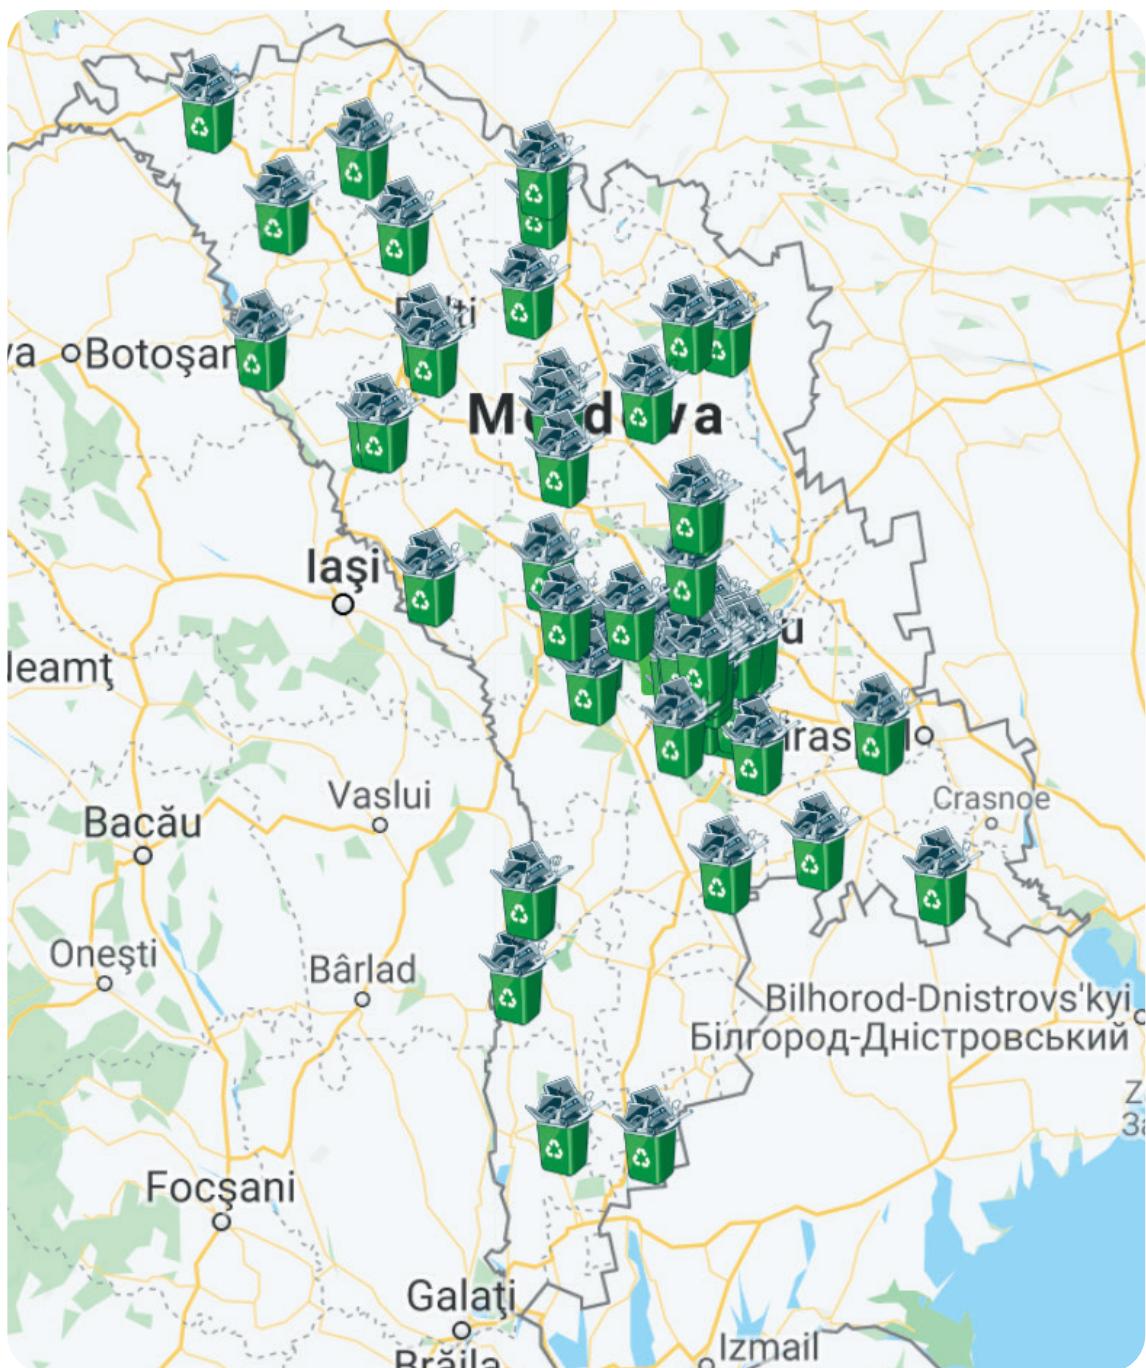

Toys, sports equipment, consoles.

On September 14th and 15th, Hai Moldova participated at IarmarEco, the fair for eco opportunities and social entrepreneurship, organized by A.O. EcoVisio, where the National campaign of collecting electronic waste was launched.

During the first day of the fair, Hai Moldova team informed visitors about the campaign, and during the evening the screening of "The Soviet Garden", a documentary produced by Dragos Turea, a Moldovan documentarist, took place. During the second day, the campaign was officially launched.

The event hosted a panel discussion - "The waste under the carpet. What do we know about waste in Moldova" - where the participants talked about health risks caused by incorrect waste management, its consequences on the water we drink and the level of awareness on waste management. During the two days of fair, Hai Moldova team installed special containers for waste collection, so as for the visitors to be able to bring their own used devices. At the event, the team managed to collect 33 kg of batteries, 69 kg of electronic equipment, 12 kg of cable.

76 electronic waste collection points were created in the country

Sîngerei, village of Ciuciuieni, the gymnasium of Ciuciuieni collected 744 kg of electronic waste

Only small and medium-size electronic waste were collected within the campaign

The pupils organized their own local campaigns for the waste collection

# Other events within the campaign.

On the 21st of September, on Global Cleanup Day, Hai Moldova volunteers cleaned the area near Durlești river, which is frequently cluttered with waste. At the same time, there were multiple similar activities happening in different towns across the country.

The Durlești river area is one of the most polluted around the capital city, having waste deposits that eventually reach the waters of Bîc river.

For this reason, Hai Moldova volunteers decided to mark the Global Cleanup Day by removing the waste from this area.

On the same day, pupils from several high-schools cleaned the areas near their schools.

Șoldănești, the high-school "Alexei Mateevici" - 1 858 kg

# The results.

At the end of one month of collecting electronic waste, 38 299 pupils from 76 schools succeeded in gathering 45 406 kg of electronic waste. On the 14th of December, within the closing ceremony of the campaign, the winning schools were awarded at Hai Moldova Gala. Pupils and teachers involved in the campaign, partners and supporters of Hai Moldova, Government representatives were present at the event.

The high-schools situated on the first three places gathered over 2 000 kg of electronic waste each:

Fălești, Făleștii Noi village , IP. Făleștii Noi Gymnasium collected 2 785 kg and was awarded with the first place, achieving a drinking water fountain and other prizes.

The school situated on the second place was Vasile Alecsandri Gymnasium from the town of Mărculești, Florești, which collected 2 744 kg of electronic waste. Their prize was also a drinking water fountain.

With 2 004 kg collected, pupils from „Emil Nicula” high-school from the village of Mereni, Anenii Noi, won a hazelnut orchard being awarded third place.

The other participating schools received gift certificates from Crafty, board games, Metro vouchers, and diplomas.

Ștefan Vodă, the primary school "Grigore Vieru" - 426 kg

## The big prizes.

**The hazelnut orchard** was offered by EuroAlun company, which is active on the market since 2018. It's a young company that already planted over 200ha of hazelnut orchards. According to the company, starting with the 3rd-4th year, children will be able to taste the nuts from their own orchard.

**The drinking water fountains** were offered by Hai Moldova Partners - Gladei&Partners, Cobzac Law and National Sports Federation.

Hîncești, village of Bobeica, the gymnasium of Bobeica collected 650 kg

# After the collection.

As there is no authorized installation for electronic waste procession in Moldova, at the end of the campaign, the collected waste will be transported to Green Group Buzau, a Romanian-based company which has IPPS authorization regarding emissions. The recycling factory was chosen in accordance with the proximity criteria, as it is the most performant factory of this type over an area of 1 500 km.

Hai Moldova team visited Green WEEE Buzău, the factory where the waste collected within the campaign will be recycled

Hînceşti, village of Bobeica, the gymnasium of Bobeica collected 650 kg

## Partners.

The project is supported by Green Growth Fund Technical Assistance Facility (GGF TAF) and financed by the European Union within EU4Energy initiative, Swedish Government, GEF Small Grants program and organized by Hai Moldova, IarmarEco, EcoVisio, AVD - „Revista Managementul Deșeurilor”.
